

ELECTROMAGNETIC RADIATION AND YOUR HEALTH

Conference with Robert P. Steller BBEI, BBEC, EE

Presented by

The Hoffman Centre for Integrative Medicine

When: To Be Announced

Where: To be Announced

Register: Call (403) 206-2333 ext 215

Cost: \$199.00^{+GST} (Seminar)

Visit our website - www.hoffmancentre.com

HOME ASSESSMENTS AVAILABLE

Contact the Hoffman Centre to Book your Home Evaluation

What do you need to know?

International and domestic research clearly shows that there is a connection between electromagnetic radiofrequency fields and human health. These fields have an effect on the immune system, the blood brain barrier, melatonin levels, birth defects, breast cancer and various types of cancer.

The most common sources of radiation are the wiring in your office and your home. Other sources are cell phone towers, power lines, radio and communication towers, cell and cordless phones and wireless technology.

Who will benefit?

- Anyone who suffers from a chronic health complaint such as fatigue, sleep disturbance, headaches, anxiety, depression and insomnia.
- Any chronic health diagnosis such as cancer, autism, multiple sclerosis, migraines

What will you learn?

- The difference between electrical magnetic and radiofrequency fields.
- The health effects of these fields on the human body.
- How to measure these fields in your home.
- How to measure your body voltage.
- Possibilities, limitations and techniques of electromagnetic shielding.

Lecture and Demonstrations by Robert Steller & Dr. Bruce Hoffman

From the International Association of Building Biologists. Robert is a Building Biology Environmental Consultant from Ontario, a professional certified in all aspects of environmental assessment

Robert P. Steller BBEI, BBEC, EE
President, Breathing Easy

Robert is a certified Building Biology Environmental Consultant and Inspector.

From 2004 – 2006 he was the Director of the International Institute for Building Biology in Clearwater, Fla.

He has consulted on new home construction in Germany, U.S.A., Brazil and Canada.

Robert teaches and speaks at international workshops and conferences.
Keynote speaker:

- Institute for Neurobiology, Seattle, Wash.
- International Conference for Electromagnetic Interference and Compatibility, Bangalore, India
- Institute for Construction Biology, Sao Paulo, Brazil
- Instructor at the International Institute for Building Biology, Clearwater, Fla., USA
- University of Waterloo, School of Architecture, Waterloo, CAN
- University of Krakau, Faculty of Medicine, Krakau, Poland
- University of San Simon, Cochabamba, Bolivia
- University of Madrid, Spain

Robert is an expert panel member for Healthy Indoors Partnership which, together with Health Canada, CMHC and the National Research Council, is creating a Buyer's Guide for products and services with low chemical emissions.

Robert specializes in Electro Ecology including the influence of electricity and electromagnetic energy, as well as cell phone radiation, on the human body.

Coming from Germany in 1999, Robert brings with him a background in the medical field and has a thorough understanding of the relationship between indoor environmental factors and human health.

Robert regularly takes continuing education courses in mould and microbial investigation and abatement techniques in Germany, Canada and the USA.

He travels frequently to Germany, keeping up to date on the latest research, instrumentation and testing techniques in his field.
